SECTION 1 - MATERIAL IDENTIFICATION

PRODUCT / CHEMICAL NAME
#2 FUEL OIL

PRODUCT / CHEMICAL SYNONYMS
HOME HEATING OIL, DIESEL OIL, OFF-HIGHWAY FUEL OIL ROAD FORCE DIESEL

CHEMICAL FAMILY / FORMULA
BRANCHED CHAIN PETROLEUM HYDROCARBONS/VARIABLE

MATERIAL USE OR OCCURRENCE
DISTILLATION PRODUCT

SECTION 3 – PHYSICAL DATA

BOILING POINT: 340°-675°F (171°-357°C) % VOLATILITY BY VOLUME: Greater than 50%

VAPOR PRESSURE (mm Hg): 1 mm Hg @ 68 F (20 C) VAPOR DENSITY (AIR = 1): Greater than 5.

SPECIFIC GRAVITY (H₂O = 1): .876 SOLUBILITY IN WATER: Insoluble.

EVAPORATION RATE (n-butyl acetate = 1): None Determined.

APPEARANCE & ODOR: Green, slightly viscous liquid, petroleum odor.

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

FLASH POINT: 126-204 F (52-96 C) (Tag, Closed Cup) AUTOIGNITION TEMP: 494 F (257 C)

FLAMMABILITY LIMITS IN AIR (% BY VOL.): LEL: 0.6 UEL: 7.5

EXTINGUISHING MEDIUM: Foam, carbon dioxide, dry chemical, halon, and water fog.

SPECIAL FIRE FIGHTING PROCEDURES: Use supplied-air breathing equipment for enclosed areas. Cool exposed containers with water spray. Continue water spray until entire container contents are cool. Withdraw immediately in the event of rising sound from venting safety devices or any discoloration of storage tank due to fire (subject to the fire chief's directions).

UNUSUAL FIRE AND EXPLOSION HAZARDS: Do not mix or store with strong oxidants. Do not store or pour near sources of ignition. Do not pressurize, cut, heat, weld, or expose to sources of ignition. Vapors are heavier than air and may travel a considerable distance to a source of ignition and flash back.

</thead>
</table>

#### ACUTE HEALTH EFFECTS

**INHALATION**
Mist or vapor may cause respiratory tract irritation. CNS depressant. High levels may cause giddiness, headache, dizziness, nausea, vomiting, and lack of coordination, narcosis, stupor, coma, and unconsciousness.

**CHRONIC HEALTH EFFECTS**
Prolonged exposure may cause dizziness, weakness, weight loss, anemia, nervousness, and pains in the limbs, peripheral numbness, and paresthesia. Renal failure possible. Degenerative changes of liver and kidneys may occur after prolonged exposure to high concentrations.

**INGESTION**
Irritation, giddiness, vertigo, headache, anesthetic stupor, CNS depression, coma and death.

No data available

**SKIN CONTACT**
Drying, cracking and defatting dermatitis. Direct contact may cause extreme irritation with severe erythema and edema with blistering and open sores. Absorption of large amounts may result in narcosis.

Repeated or prolonged exposure may cause irritation, dermatitis, and a rash of pimples and spots.

**EYE CONTACT**
Irritation is possible. However, animal studies indicate that irritation is unlikely.

No data available

### FIRST AID PROCEDURES

**INHALATION:** Remove from vapor to fresh air. If breathing has stopped give artificial respiration. Maintain airway and blood pressure and administer oxygen if available. Keep affected person warm and at rest. Qualified personnel should perform administration of oxygen. Get medical attention immediately.

**INGESTION:** DO NOT INDUCE VOMITING or give anything by mouth to an unconscious person. When vomiting occurs, keep persons head lower than head to prevent pulmonary aspiration. Get medical attention immediately.

**SKIN CONTACT:** Remove fuel soaked clothing. Wash affected area with soap or mild detergent and large amounts of water until no evidence of chemical remains (approximately 15-20 minutes). If irritation develops, seek medical aid.

**EYE CONTACT:** Flush eyes immediately with large amounts of water, occasionally lifting upper and lower lids until no evidence of chemical remains (approximately 15-20 minutes). If irritation develops, seek medical aid.

### TOXICOLOGICAL DATA

Kerosene generally contains benzene which has been designated a carcinogen by the National Toxicology Program (NTP), the International agency for Research on Cancer and the Occupational Safety and Health Administration. Benzene may produce blood changes that include reduced platelets, red blood cells, and white blood cells; also aplastic anemia, and acute nonlymphatic leukemia. Benzene has produced fetal death in laboratory animals and caused chromosome changes in humans and mutation changes in cells of other organisms. Health effects attributable to benzene aren’t known to occur in humans exposed to kerosene. Kerosene has caused kidney injury in male rats only. No comparable health hazard for kidney disease is known to occur in humans. An epidemiology study or workers exposed to two isomers of trimethylbenzene had symptoms of nervousness, tension and anxiety, and asthmatic bronchitis. In addition, after inhalation of 60 ppm measured as hydrocarbon vapor, the works’ peripheral blood showed a tendency to hypochromic anemia and a deviation from normal in the coagulability of the blood. Exposure of pregnant rats during gestation to toluene at levels of 250 ppm and higher produces some maternal toxicity and fetal toxicity. A lifetime inhalation study in rats did not show any toxic effects even at the high dose of 300 ppm. Behavioral signs of hearing loss were observed in rats exposed to toluene subchronically at levels of 1000 ppm or more. Comparable effects have not been reported in humans.

SECTION 6 - REACTIVITY DATA

<table>
<thead>
<tr>
<th>PROPERTY</th>
<th>INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>STABILITY:</td>
<td>Stable under normal temperatures and pressures.</td>
</tr>
<tr>
<td>HAZARDOUS POLYMERIZATION:</td>
<td>Hazardous polymerization has not been known to occur under normal temperatures and pressures.</td>
</tr>
<tr>
<td>CONDITIONS TO AVOID:</td>
<td>May be ignited by heat, sparks, or flame. Vapors may travel to a source of ignition and flash back. Vapor explosion hazard indoors, outdoors, or in sewers.</td>
</tr>
<tr>
<td>INCOMPATIBLES:</td>
<td>May explode or react violently when exposed to oxidizing materials.</td>
</tr>
<tr>
<td>TYPICAL DECOMPOSITION PRODUCTS:</td>
<td>Thermal decomposition may release various hydrocarbons and hydrocarbon derivatives including carbon dioxide, water, organic acids, and aldehydes.</td>
</tr>

SECTION 8 - SPECIAL PRECAUTIONS

<table>
<thead>
<tr>
<th>PRECAUTIONS FOR SAFE HANDLING AND STORAGE:</th>
<th>INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPILL AND LEAK PROCEDURES:</td>
<td>Shut off ignition sources (no smoking, shut off flames or flares in hazard area). Isolate hazard area and restrict entry. If properly trained, proceed with the following measures: 1. For small spills, take up with sand or other absorbent material and place into containers for later disposal; and, 2. For large spills, dike far ahead of spill to prevent entrance into watercourses and/or ground water. Observe local, state, and federal governmental regulations.</td>
</tr>
<tr>
<td>WASTE DISPOSAL METHOD</td>
<td>1. Under EPA RCRA (40 CFR 261.21) If this product becomes a waste material intended for disposal and has a flash point below 140 F, it would be ignitable hazardous waste (waste code number D001). Refer to latest EPA or state regulations regarding proper disposal. 2. Under EPA RCRA (40 CFR 261.21) If this product becomes a waste material intended for disposal and has a TCLP benzene concentration greater than 0.5 PPM, it would be considered a toxic waste (waste code number D018). Refer to latest EPA or state regulations regarding proper disposal.</td>
</tr>

</table>
**SECTION 9 - DOT HAZARDOUS MATERIAL INFORMATION**

**PROPER SHIPPING NAME:** FUEL OIL (#2)  
**REQUIRED PLACARDING:** FLAMMABLE OR COMBUSTIBLE / 1993  
**HAZARD CLASS:** CLASS 3 (Flammable liquid)  
**PACKING GROUP (P.G.):** III  
**N.A/U.N. NUMBER:** NA 1993  
**HAZARDOUS SUBSTANCE / RQ:** NOT AVAILABLE  
**SHIPPING DESCRIPTION:** FUEL OIL (#2), 3, NA 1993, PG III

**NOTE:** This product may be re-classed as a combustible liquid when shipped domestically, by land only. If re-classed as a combustible liquid, this product is unregulated by DOT when shipped in non-bulk quantities.

**SECTION 10 - EPA SARA TITLE III INFORMATION**

**SECTION 311/312**
