Market Commentary

Recap: On Thursday, oil prices pared losses from the previous session, amid rising tensions in the Middle East, but gains were limited by concern over a slowing global economy and its impact on demand. September WTI added \$1.11, or 2%, to reach a session high of \$56.99 a barrel by 9:00 am EST. September Brent rose \$1.05, to a high of \$64.23 a barrel. So far, this market has been unable to sustain gains despite yesterday's bullish EIA report and continued geopolitical turbulence in the Middle East. Those that had hope of higher prices are beginning to lose stamina, adding to the stagnant move to the upside. September WTI rose 14 cents, or 0.3%, to settle at \$56.02 a barrel, while September Brent added 21 cents, or 0.3%, to settle at \$63.39 a barrel. September RBOB rose 1.2%, to finish at \$1.8254 a gallon, while September heating oil rose 0.3%, to settle at \$1.9227 a gallon.

<u>Technical Analysis:</u> The \$57.00 level in WTI continues to prove itself as a key area of resistance, as it held up again on Thursday. With the 10-day moving average crossing below the 50-day moving average, we should see a push toward \$55.00. We would look for continued sideways trading between the range of \$57.00 and \$55.00. Resistance remains at the aforementioned moving averages, with support set at \$55.00 and below that at \$54.40.

Fundamental News: Two OPEC sources stated that a panel of OPEC and non-OPEC ministers, which reviews the producers' output policy, will meet on September 12th in Abu Dhabi. The Joint Ministerial Monitoring Committee observes oil market developments and can make a recommendation to the countries signed up to the deal. A day before the JMMC meets, a technical panel called the JTC will hold its meeting.

Saudi Arabia's Energy Minister, Khalid al-Falih, called on global oil buyers to secure their energy shipments passing through the Strait of Hormuz. Concerns of disruptions in the Strait of Hormuz increased after the Iranian Revolutionary Guards seized the British-flagged oil tanker Stena Impero in the waterway on Friday in apparent retaliation for the British capture of an Iranian tanker two weeks earlier. Saudi Arabia's Energy Minister said Saudi Arabia hopes to expand the East West crude pipeline bypassing the Strait of Hormuz by 40% to 7 million bpd in a couple of years. He also stated that current oil demand is reasonably healthy.

A US administration official said there will be a decision before a July 27 $^{\rm th}$ deadline on renewing a license for Chevron Corp's operation in Venezuela.

Canada's Suncor Energy is hopeful the Alberta government will decide in the next month or so to sign an agreement that would allow oil producers to increase their output despite ongoing curtailments. Crude production has been limited since the beginning of 2019 when the government imposed curtailments to ease congestion on export pipelines that had pushed the discount on Canadian crude to record lows.

Enbridge Inc said it was open to working with the Bad River Band and will consider re-routing its Line 5 oil pipeline after the Native American tribe in Wisconsin sued the company seeking to shut the pipeline. The Bad River Band filed a federal lawsuit against Enbridge asking for a section of Line 5 that runs across its reservation to be decommissioned and removed because of the risk of a leak.

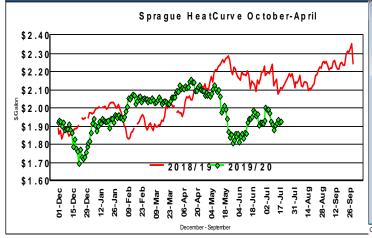

Total product stocks independently held in the Amsterdam-Rotterdam-Antwerp refining and storage hub fell by 3% to 6.19 million tons in the week ending July 25th. Gasoline stocks increased by 1.06% on the week and by 31.22% on the year to 1.24 million tons, while gasoil stocks increased by 0.4% on the week and by 24.39% on the year to 2.978 million tons and fuel oil stocks fell by 10.9% on the week and by 23.64% on the year to 1.014 million tons. **Early Market Call - as of 8:05 AM EDT**

WTI - Sep \$56.48, up 45 cents

RBOB - Aug \$1.8882, up 48 points

HO - Aug \$1.9188, up 32 points
